Bibliography

Fabrizio De Santis is a **Ph.D. student in Information Technology at the University of Parma**, where he conducts research at the intersection of process science and artificial intelligence. His work focuses on designing and developing **neuro-symbolic methods** that combine the interpretability of symbolic reasoning with the predictive power of machine learning, with applications spanning **predictive process monitoring** and **clinical decision support** in the healthcare domain. De Santis is driven by the goal of building AI systems that are not only accurate, but also transparent, fair, and reliable in real-world settings. His research has touched on problems such as compliance-aware process monitoring, counterfactual fairness in prescriptive analytics, and sepsis prediction from clinical event data. He earned his Bachelor's degree in Computer, Electronic and Communications Engineering and his Master's degree in Computer Engineering, both from the University of Parma. During his Ph.D., he has collaborated with the **Process and Data Science (PADS) group at RWTH Aachen University**, under the supervision of Prof. Dr. Wil van der Aalst, one of the leading figures in the process mining community.

Professional Experience

RWTH Aachen University — PADS Group December 2024 – May 2025
Visiting Ph.D. Student Aachen, Germany

- Research visit under the supervision of Prof. Wil van der Aalst
- Worked on neuro-symbolic AI for predictive process monitoring

University of Parma July 2022 – June 2023
Research Fellow Parma, Italy

- Applied ML and NLP models to the legal domain
- Developed a multi-label classifier for labeling maxims related to the Italian Penal Code
- Fine-tuned a pre-trained BERT model on a large corpus of legal maxims

Teaching

CRPA - Centro Ricerche Produzioni Animali May 2026
Contract Instructor Bologna, Italy

- Topic: Cybersecurity and Generative Artificial Intelligence

ITS Olivetti February 2025 – March 2025
Contract Instructor Parma, Italy

- Topic: Digitalization of processes in business settings and in the creative and cultural sector through AI solutions and immersive technologies

Fondazione Alma Mater November 2024
Contract Instructor Bologna, Italy

- Topic: Services and Innovation for Industry 4.0 - Process Mining and Predictive Process Monitoring

Education

University of Parma November 2023 – Present
Ph.D. in Information Technology Parma, Italy

- Topic: Artificial Intelligence for Business Processes
- Supervisor: Prof. Francesco Zanichelli

University of Parma September 2021 – October 2023
M.Sc. in Computer Engineering' Parma, Italy

- Thesis: Design and development of a recommender system based on NLP and Deep Learning for legal applications
- Supervisor: Prof. Stefano Cagnoni
- Summa Cum Laude

University of Parma September 2017 – April 2021
B.Sc. in Computer, Electronic and Communications Engineering' Parma, Italy

- Thesis: A coevolutionary approach to pattern classification based on Genetic Programming
- Supervisor: Prof. Stefano Cagnoni

Publications

Journal Articles

- F. De Santis, G. Park, F. Zanichelli, 2026. **Neuro-symbolic artificial intelligence for real-time sepsis mortality prediction**. *Engineering Applications of Artificial Intelligence*, 2026.

Conference Papers

- F. De Santis, G. Park, W. van der Aalst, F. Zanichelli, 2026. **Compliance-Aware Predictive Process Monitoring: A Neuro-Symbolic Approach**. *In: AdvancedInformation Systems Engineering - 38th International Conference, CAiSE 2026,Verona, Italy, June 8-12, 2026, Proceedings. In: Lecture Notes in Computer Science,Springer*

- F. De Santis, G. Park, F. Zanichelli, 2026. **Neuro-Symbolic Learning for Predictive Process Monitoring via Two-Stage Logic Tensor Networks with Rule Pruning**. *Advances in Knowledge Discovery and Data Mining - 30th Pacific-Asia Conference, PAKDD 2026, Hong Kong SAR, China, June 9-12, 2026, Proceedings. In: Lecture Notes in Computer Science, Springer*.

Skills

Languages : Python, JavaScript, HTML/CSS, SQL, C, C++, Java
Libraries : PyTorch, scikit-learn, Pandas, Numpy, Hugging Face Transformers/TRL, vLLM, Unsloth, LTNtorch
Topics : Machine Learning, Neuro-Symbolic AI, Predictive Process Monitoring, Healthcare AI, LLM Fine-Tuning (LoRA, DPO, GRPO), Natural Language Processing

Languages

Italian Mother tongue
English B2
